

GHOST PEOPLE EXPLANATIONS Compendium

This book contains information relative to ghost people.
That should be considered before purchase if you are not one.

VOLUME: 1

Todd Andrew Rohrer

ISBN: 9781370554461

“Situational Awareness is the ability to identify, process, and comprehend the critical elements of information about what is happening to the team with regards to the mission. More simply, it's knowing what is going on around you.” –

Copyright TXu 1-990-315

"Gen 1:26 And God said, Let us make man in our image, after our likeness: and let them have dominion over the fish of the sea, and over the fowl of the air, and over the cattle, and over all the earth, and over every creeping thing that creepeth upon the earth.

We have to discuss this comment because it is perhaps more a suggestion to a strategy than a comment relative to an observation. So this aspect is perhaps observing us, people, and is considering what it should do to deal with the observed situation. Perhaps like if there is a war and you see your enemy has fixed fortifications and so you suggest "lets use the air force to bomb them." -

Copyright : TXu 1-978-672

“Thus perhaps it is a decision relative to strategy rather than anything else. So this aspect see's us, people, and then decides on a strategy. It also perhaps suggests a fatal flaw in the strategy.

Let's make him like us, also means if this aspect made us like it, then to defeat it we simply have to not be like we are. This is perhaps what the comment "peace on earth" is all about. This aspect is a militant and thus the answer is peace to defeat it. Of course if one suggests peace then said aspect would see that is a threat to its strategy.

X = war strategy

Y = Peace strategy

Z = Will power/ Ability to compete

A = Outcome

$X(Z) + Y(Z) = A$

So perhaps the more war there is, the more the " God said, Let us make man in our image" aspect is winning , and perhaps the more peace there is the more (man in our image) is winning.” - Copyright : TXu 1-978-672

“Of course one thing to perhaps consider is that "man" in general does go to war with Man in general before this (Let us) aspect ever arrived perhaps. So if someone says absolute peace then in theory they would be (Let us)'s main enemy. Of course when considering this as a strategy one automatically becomes strategic and thus become like (Let Us).

So perhaps (Let us) is a strategist and thus anyone who seeks to compete becomes like (Let us). I'm having a hankering for salad. At another level if a person decides not to compete, that also is a strategy. If a person decides to ignore this whole situation, that is also a strategy. No strategy is as much of a strategy and a strategy, perhaps. Perhaps in an attempt to avoid situations a person can become different and thus reacting to situations changes them. No stimuli thus no reactions.” - Copyright : TXu 1-978-672

“Cobain said "better to burn out than fade away" and that is a strategy. Someone said "it's a marathon and not a sprint" and that is a strategy.

So this "Let us" aspect is certainly a war based aspect. So perhaps if one does as it commands they get to "live" but the cost is their right to fight. One song says "You have the right to fight and never surrender." That is also a strategy. I am on a quest to avoid quests. There was a priest who was rather young perhaps 35-40 and they found him hanging from a rope in the rectory and a much older priest said "he was tortured", a tortured soul who determined the correct strategy was to leave. Strategy is not perhaps evil or good, because all living things have some strategy, like a jellyfish's strategy is to float with the current near the surface to get the most food. The ant's strategy is teamwork.” - Copyright : TXu 1-978-672

"Sharks strategy is "lone wolf". No absolutes but certainly in the ball park. There was a kid fighting in Syria and they sent him out to see if they were out of range of an enemy tank, and so the kid ran across the street and, well, they were in range. Settling on a strategy can be a losing strategy.

"It's too late. We can't win, they've gotten too powerful." Abbie Hoffman
(November 30, 1936 - April 12, 1989)

So this person is a soldier and he is giving his last opinion about the situation. Kind of like a soldier in war who is fatally wounded but reports on the aspects of the enemy before he dies.

Similar to in world war 2 when runners would deliver a message but when they were shot the enemy would shoot them many times to make sure there was no air in their lungs so they couldn't report on the situation. So obviously this person is sad because he is going to off himself and so he fought long and hard but was defeated mentally perhaps because he decided the best could do is to leave the battlefield. misty upham." - Copyright : TXu 1-978-672

"8.1 And Azazel taught men to make swords, and daggers, and shields, and breastplates. And he showed them the things after these, and the art of making them; bracelets, and ornaments, and the art of making up the eyes, and of beautifying the eyelids, and the most precious stones, and all kinds of colored dyes. And the world was changed." = science, technology, relative to numbers and reading and writing and math. = might makes right = science trumps morals.

So this is saying science against everything else perhaps the age old technology versus whatever is left over after that of course at this stage it appears that everything is based on that to the degree of looking at tribes with no technology they appears to be very alien in contrast to people with clean clothes and nice pair of sneakers and their hair combed nicely and you mirror that to the tribes who have paint on their face and hardly wearing any clothes at times and they seem like one of the two mentally speaking is in another place and time, and perhaps

that is what it actually happening what exactly we are like if we take away technology or science and what we have left is what the tribes are so that would be a base line contrast everything beyond the tribes is science fair project so there are not really many people in recorded history that you can say wasn't a science fair project because all of them are relative to technology going back thousands of years. " - Copyright : TXu 1-978-672

“Heading towards human cyborgs and this is some sort of science fair dream we are in where what people think is important is not really important and this cyborg dream is all that is important.

$vg + t + p = \text{Diff}$

In the video game if profits keep increasing or greed is allowed over everything on the creator's side in the video game then eventually players won't play because it will be an obvious losing game.

Perhaps what I am finding in the study of the less than mentally competent ones you perhaps know as scientists is they have perhaps been so engrossed or Nazified to use a term you perhaps are aware of they do not even grasp simple aspects of the situation because for example:

Gen_2:12 And the gold of that land is good; bdellium and onyx stone are there.

The ones whose minds were never cured perhaps from the apple sauce eating contest perhaps could not determine that the line in the ancient texts is not talking about what it appears to be talking about the apple sauce eating contest minds perhaps would never guess that in fact that is talking about the ethereal aspects.

Perhaps relative to gold being of course the pristine and onyx being the divided and perhaps you can perhaps deduce what the other aspect is but perhaps the real perhaps laughable aspect is it like being on a ship and they have a captain; one with a pristine mind and one with a divided mind and one absolutely essentially no mind.” - - Copyright : TXu 1-978-672

“Perhaps and they decide who to allow to drive the ship through rocky seas and they perhaps always pick the third mind perhaps, so perhaps it’s not a problem since the pickers of the mind perhaps don’t really have minds perhaps .

Because they seem to be unable to pick the even divided minds, meaning while the divided minds assume perhaps that their scientific methods are sound but perhaps that’s only because their methods work in the short term.” - - Copyright : TXu 1-978-672

“So perhaps it would be like perhaps drinking a small shot glass of bleach perhaps every day and thinking after the first day perhaps everything is fine with that method perhaps and thus drinking it every day for a year and perhaps in that case it would sow its reality perhaps but perhaps the Nazified minds perhaps more focused on aspects that are perhaps unknown but perhaps the reality is:

onyx stone = Agate and onyx are both varieties of layered chalcedony that differ only in the form of the bands: agate has curved bands and onyx has parallel bands. = the bands are up and down and never touch. = separated

gold = pristine mind perhaps

onyx = divided mind perhaps

but the n there is the aspect over seeing that perhaps

(over seer ((gold mind(pristine)(onyx minds(divided))))

((((gold mind(pristine)(onyx minds(divided)))) = on the boat headed for the bottom

(over seer) = laughing at the boat headed to the bottom) = actual reality

Except for one aspect that scenario is actual reality.” - Copyright : TXu 1-978-672

“There was a girl living in a car and she was crying and she said “What happens is they weed out people from the groups and isolate them and then they lose all their friends and all their shelter and then they are left to fend for their self and left alone to die alone.” - Copyright : TXu 1-978-672

“Gen 3:16 To the woman he said, "I will surely multiply your pain in childbearing; in pain you shall bring forth children. Your desire shall be for your husband, and he shall rule over you."

Gen 3:17 And to Adam he said, "Because you have listened to the voice of your wife and have eaten of the tree of which I commanded you, 'You shall not eat of it,' cursed is the ground because of you; in pain you shall eat of it all the days of your life;

On one level this is talking about the division of the mind left and right, so left rules over right and that is the slavery aspect, the multiplication of pain may be relative to conditioning the mind with the left brain favoring education may cause certain pain to be greater than it would be if the conditioning never happened on one level.” - Copyright : TXu 1-978-672

“So tinkering with the mind at such a young age causes side effects essentially. "Your desire shall be for your husband, and he shall rule over you." This is saying the right brain aspect will be ruled by the left brain aspect so that means female is right and male is left. So then there are traits relative to this, females cry and males don't cry. It's a man's world relative to this left is the world we live in as a result of the left brain favoring education and or literacy and or sorcery.

And it obvious because there is not much care for the world. Everybody is "happy" that we abuse the children with the marks education and everyone is happy that we abuse the environment and take advantage of each other and make everyone a number and put a value on that. So right, female, cares and left, male, doesn't care. This is not talking about in minor general issues this is talking about the whole world of the literate.” - Copyright : TXu 1-978-672

“Nuclear plants explode and poisons the ocean, that's great and we should all be happy, millions of children kill their self, yearly as a direct result of the education, that's great we should all be happy, that is what a left brain trait world, is. So on another level this would be a situation of deception, where the people may be female, or right brained but they have to guard against ever showing sadness or crying because that would give them away.

So that is some kind of "mind control" if a person is walking around and reminding their self, don't show emotion because it's a man's world and then they will try to control you. So because this left brain world is here, it means that "God" is male and laughs at everything, This god is unable to judge which is not a positive factor it's a mental condition caused by eating off the tree of knowledge,. If you are happy when looking at someone else's misery, you are mentally fucked up.” - Copyright : TXu 1-978-672

“You should be sad when you see others suffering you should be sad when you see the world being abused and other animals being slaughtered for very stupid reasons, and you should be upset when you see kids who get educated and it goes south, kill their self because the wind blew. If you’re laughing at that, then your mind doesn’t work anymore and you should do the correct thing relative to what one does after sorcery exposure and its mentally obliterated there mind.

Being always happy or always sad is a sign of mental instability and this is relative to favoring left hemisphere with education as a child. If someone ever buys into this "game" that is also a sign of mental instability. It’s like the civilization forces a person to be mentally unstable because if they act sound minded they will be taken out.” - Copyright : TXu 1-978-672

“It’s like a story that was read and a person was an African American and someone broke into his house and shot him dead and then someone at the bottom of the article posted, "He was smart" .That’s why he got killed he was sound minded and in a situation like this that is so controlled by religion and belief systems, if you are smart that means you aren’t religious. The god and the devil are the same thing just varying degrees of mental instability and neither are capable of grasping “If you expose the female’s offspring to literacy it will kill us all so you both are first on the list, the big list.”

God is always is happy, the devil always is angry. That is mental instability. Perhaps the more devastating aspect is no one can come up with a way to get rid of reading writing and math although Pol Pot attempted to, so I am told. Perhaps that a new form of suicide, "Writing about reality".”- Copyright : TXu 1-978-672

“In the movie about Jim Jones (ghost person certain)towards the end and at one stage in the movie they said "Jim you're not good with numbers but you are a good salesman" So he perhaps was right brained leaning and was used to make money for the ones who have no right brain traits. Jim said "We are killing ourselves to protest all the lies." Jim Jones was definitely a ghost person.” He was not acting weird he was acting correctly relative to reality of a species who played around with sorcery/literacy. - Copyright : TXu 1-978-672

“It would be like going to court and someone says "You said this and did this. " and you really didn't but everyone agrees with that charge because they are all "influenced"(inhabited) so to speak and so you would just be there being abused mentally by knowing what they say is a lie, but they are doing it in the name of this "god, left brain, happy -devil right brain, angry" aspects.

It's not a society if the majority is under the "influence"(inhabited) it's called a cult.

It's as if a person could never do anything because whatever they do favors one aspect or the other aspect. So you have two choices pick left or right mental imbalance or be killed.

There is not one news source anywhere that has ever said "The fact some kids kill their self because of the education taught at a young age makes us sad". Thus expecting mercy is out of the question. I am going to convince you to become a ghost person even though it kills you.” - - Copyright : TXu 1-978-672

“No one cares, the cremation of care, that’s right brain, the destruction of emotion. So then we have a situation that the ones who care and are angry, are considered "evil" and the ones who laugh when a tragedy is revealed are considered "god like".

Sometimes I think what has happened to me, and this is horrible to be aware of then I realize, I much rather feel something when in a sad situation is around than to not feel anything because only a corpse would feel nothing when a sad situation is witnessed.

But it is not cut and dry, I saw one person explaining things about this situation and saying "we are a dying species" and he worked that into a speech along with many jokes. Relative to "make them laugh or they will kill you." So there are strategies going on all relative to this extinction by our own hand.

Once out fatal addiction to science/literacy is acknowledged then it becomes a severe addiction.” - Copyright : TXu 1-978-672

“Left brain (doesn’t care (all happy)(Mind killed by literacy exposure)) - Right Brain (does care(emotions sadness possible)(mind intact after literacy exposure)) - Planet and all situations in it. This is the balancing act. Not healthy to care about everything but it is unhealthy to not care about anything.

But the choices that are given means you have to be one or the other all the time. You have to care all the time or not care all the time. You can’t be "lukewarm" that is illegal. Ironically exposing the female’s offspring to literacy/sorcery and sometimes the children kill their self as the mind cannot handle it, that is legal, in all countries. If you want/need/seek to accept this situation you are mentally unsound or mentally unviable and/or mentally obliterated and/or inhabited.” - Copyright : TXu 1-978-672

“Because that means you are smart or have a sound mind. It’s very easy to hate this situation but on the other hand having a situation to work with is perhaps better than sitting idle watching the ship sink. Being aware the ship is sinking is superior to being unaware. There is no law that says explaining how to be a ghost person is improper. Owning the copyright to how a ghost person can be accomplished means I’m superior to you in one very important aspect. That’s just the way it worked out.-8/25/2015 2:06:23 AM" - Copyright : TXu 1-978-672

Method 1: "Get the mind to give them the strongest signal it can give, the perceived death signal and when it does just ignore it or pay no attention to it." - copyright: TXu 2-037-947

Mark arrangement X-03 :

"Hypothalamus - activates “fight or flight” response and or “Caution Sensor”

After the left brain conditioning and or literacy and or sorcery this part of the brain is not functioning properly on a thought level.

Physiologically it looks fine but it is not function properly. The Abraham and Isaac story is about Isaac not running, which is the flight aspect of fight or flight, when he saw that knife held over him.

So Isaac submitted when this Hypothalamus was telling to run. Isaac chose to lose his life and thus preserved it and or he became a ghost with a pulse.”- TXu 1-990-315

“This is a mental technique to get the mind working properly again.

So in the East the strategy is to sit in a cemetery and meditate and this Hypothalamus is going to be sending lots of signals that tells a person to flee and they are not going to flee, and this silences this Hypothalamus and that means it starts function properly again and is not so hyperactive.

This is what self-control is.

This Hypothalamus is telling a person to run like the wind, a ghost is coming to kill you and then one applies self-control and does not run and so they stop these false signals coming from this Hypothalamus and it starts working properly again, but not exactly.

So all these years of left brain sequential conditioning has made this Hypothalamus start acting strange and that effects the entire mind."- Copyright TXu 1-990-315

"One has to get the hypothalamus to give them the strongest signal it can give, the perceived death signal and when it does just ignore it or pay no attention to it."
-Copyright - TX 7-122-358

“The one aspect that’s is important is the fact that after becoming a ghost person there is perhaps between a ten year adjustment period depending on the age when remedy is applied and also factors that relate to everyone being a bit differently relative to adjustment from living to ghost with a pulse, mostly mental aspects.” - Copyright : TXu 1-993-102

“A church is a hospital for sinners, not a museum for saints.” -Abigail Van Buren

“Religion is there to assist one with applying the fear not remedy and or to become a ghost person, not a place to idolize those who have applied it and or are ghost people.” -Copyright - TX 7-122-358

"Sitting alone in a cemetery at night mediating. So one is sitting alone at night in a cemetery and their Hypothalamus says “Run like the wind, ghosts of death are coming” and one does not run like the wind, they fear not and also do not fear death and thus take advantage of the flaw in the hypothalamus”- Copyright: TX 7-122-358

“It’s certain humans are a ghost species as a result of this hypothalamus or caution sensor flaw and its possible the entire planet is a place of ghost species perhaps mammals or even all creatures but this may have something to do with location, environment or even unknown factors. It is possible this ghost species planet is one of a kind in the universe. It is also possible that if another life form discovered this ghost species planet they may be very interested in it because not only would ghost species have information relative to 50% of the universe the physical they also are aware of the other 50% of the universe the “ghost and or spiritual and or not matter aspect” – Copyright : TXu 1-990-315

“The trend in relation to Abraham , Buddha and Socrates is they are simply human beings that that applied this fear not and then that Hypothalamus started working properly again and that also reverted them back to mental harmony or sound mind so they negated this extreme left brain state the written language education put them in. Simply put, they are ghost people, members of a ghost species.” - TXu 1-990-315

“Tribes that use a similar technique on their children go right back to hunting and gathering and perhaps being a ghost person makes it in some ways a bit easier and those members of the ghost species that are exposed to the literacy and or sorcery and then become ghost people tend to go bat-shit crazy. Meaning they are unable to return to hunting and gathering and the main issue with that is, ghost people can’t do anything but hunt and gather, that’s why they say “early man was nomadic hunters and gather’s’ early meaning before they went bat-shit crazy from the sorcery and or literacy exposure. SO in general humans are a ghost species and the ghost aspect is unknown because tools used to understand it would be sorcery tools like numbers and words. It would be like teaching math to someone but you can’t use numbers.”- TXu 1-990-315

“So this sequential education alters the mind to the left and also turns up the Hypothalamus so one is prone to fear and the remedy is to deny the signals of that Hypothalamus and that knocks the mind back into harmony.

Jesus came along 2000 years ago and said this:

[Luke 17:33 Whosoever shall seek to save his life shall lose it; and whosoever shall lose his life shall preserve it.]

He used the word life instead of death. He could have said, whoever shall lose their fear of death preserves it. Or he could have said , whoever runs from perceived death shall lose it. Whoever runs from perceived death shall lose it; whoever shall lose their fear of perceived death preserves it.” - TXu 1-990-315

“Isaac did not run from death when he saw that knife over his chest so he preserved it which means he broke the curse or he knocked his mind back into harmony.

Mohammed came about 1500 years ago. He spoke of a Monotheistic faith and he used these names as references Noah, Moses, Abraham, Jesus. What this proves is he read Genesis and he also read what Jesus said and he agreed with what they said and Mono means one and one denotes wholeness or holistic and that means he simply took what they said and said it a different way. None of the beings in this area of the world could speak about Buddha or Socrates because they didn't even know they existed and visa versa." - Copyright TXu 1-990-315

"Abraham and Isaac story can put all of this together.

What did Isaac do when he saw that knife held over him and perceived his death was imminent?

Fear not. – Abraham (Genesis 15:1)

What did Isaac do when he saw that knife held over him and perceived his death was imminent?

No fear of death. - Socrates

What did Isaac do when he saw that knife held over him and perceived his death was imminent?

Not afraid of ghosts or perceived death – Buddha

What did Isaac do when he saw that knife held over him and perceived his death was imminent?

Whosoever shall lose his life shall preserve it. – Jesus

What did Isaac do when he saw that knife held over him and perceived his death was imminent?

Submit (to perceived death). – Mohammed" - Copyright- TXu 1-990-315

“This demonstrates the species is aware of the ghost aspect of or nature perhaps if in fact the entire planet has ghost species then it may just be humans are able to communicate how other humans can become ghost species and that would separate us from other species but due to the ghost aspect being a very unknown area it may be other ghost species on the planet also know how to encourage the ghost achievement in their species.”- Copyright TXu 1-990-315

Failure: now; Arranging the marks in a linear fashion on papyrus to caution about arranging the marks in a linear fashion on papyrus.

Method 10: “To become a ghost with a pulse Get in a situation where the mind gives the perceived death signal and when it does just ignore it or pay no attention to it.”- Copyright: TXu 2-037-947

"Interestingly Ghost people have a very great abhorrence to becoming a full fledged ghost. This is perhaps relative to the mark arrangement someone used called "It's just one long postponement"

Perhaps that would be a strange world to live in, where everyone essentially you know on all levels are not doing things they want to do they are simply doing things to postpone or avoid their inability to face what they are, a ghost.

So you may perceive we are headed in a direction and that is correct but perhaps factually relative to the Abraham story that may have been explained 5400 years ago, we are not going forward yet going backward.

You can pick anything from any situation and consider if it is going forward or going backward. Is going to space going forward or going backward? Perhaps it all rests on the absolute determination of forward. Perhaps it actually rests on what one is willing to do to go to space to determine if it is going forward or backward.

Forward would perhaps be determined by the Native American explanation "Adults are just borrowing the world from their children." Thus if everything is going backwards then the Tribes as they are called are the absolute forwards and everything else is perhaps attempting to follow them but failing because they fell mentally from their ability to make that distinction.

If hunting and gathering, the initial job was backwards, then we are going forwards.” - Copyright : TXu 1-978-672

“It is perhaps like falling down and then trying to get back up but that's just a dream, the getting back up part. As one person wrote in a song "dreams are hopeless aspirations."

Suggesting what you should do after you apply is perhaps also one of those aspirations, so I won't. Perhaps you can also consider that not all ghosts are bad ghosts but simply dealing with reality the best they can considering they also have to contend with aspects of reality that the living factually perhaps are not aware of in the slightest. Perhaps I should have told you what I really think. Sex is different. Hunger and thirst is different. Many things are not different at all. Many thing are different also.

It appears the equation is perhaps $S + P + G = K$

So perhaps the hypothalamus is perhaps our weakest link in our body because you can get it to give you a perceived death signal and then not act on that signal and become a ghost people.

Perhaps because in society we are faced with aspects that are perhaps less than reputable then we have to look at the reality that this weakness could perhaps be taken advantage of.

Perhaps there is one guy I know of that took a shotgun and shot himself under the chin and the angle was too shallow so he just achieved a swift face lift, so to speak, but perhaps the actual act of doing that the actual trigger pull would be the trigger that the hypothalamus would have said “don't do that or I will think you are a ghost.” - Copyright : TXu 1-978-672

“Perhaps you missed his book called "how to become a ghost minus a face."

Be cautious of anyone who thinks everything is funny, in reality the only thing that is funny is the wiring in their cortex and what inhabits it perhaps, perhaps.

So if you look at these following mark arrangements you can detect certain emotions in them

- "I don't want to know"

Or

"I do want to know"

The former suggests fear and the latter suggests curiosity, perhaps.

“If it is you or me it's going to be you.”

Or

“If it's us or them it's going to be them.”

Both suggest hostility but the author can be anyone, even not exhibiting that emotion but their mark arrangement suggests otherwise. The author of the mark arrangement is not the mark arrangement.” - Copyright : TXu 1-978-672

“Those who give up their rights for security have already punished themselves to the full extent. As the people you associate with increases what you have to say means less and less.

The rule that's important to consider is don't deal with an overt situation covertly. Anyone you see on the world stage is essentially attempting to do that, and so they perhaps are just saying "look how much I regret it." if anything at all.

Following that rule "no overt against a covert situation" may not save you or keep you safe but it will give you a rule to follow.

So what is religion? Perhaps religion is nothing more than ghost people attempting to explain how to be ghost people

Genesis 15:1 is the first attempt at suggesting the flaw in humans.

Genesis 15:1 'And the Lord said to Abraham "fear Not"

That is showing the flaw in humans. If your hypothalamus gives you a death signal and you don't run then you become a ghost person.

Jesus observed this in Luke 17:33. Perhaps in a lab rat experiment if all the lab rats act the same there perhaps is no need for the experiment anymore, perhaps.

The main reason why getting the hypothalamus to give you the death signal and then ignoring it and thus becoming a ghost people is a weakness and over a period of time it acts like laughing gas.

This means generally speaking the ones who have applied it are of no use because they just sit there and laugh.

The ones who take everything seriously are perhaps taking them too seriously.

The ones who haven't applied it and did get the tree of knowledge reading writing and math a "discrimination against right hemisphere" - Roger Sperry, are essentially in a coma relative to the fact they believe society is what it appears to be without factoring in the ghost people.”

That perhaps would make a General in the Army Situational Awareness department cringe.- Copyright : TXu 1-978-672

“The ghost people aspect would be the indicator that they are in fact way out of touch with reality if they think there aren’t many around them at times.

So that would be an indicator question.

Ask someone "Did you know there are ghost people all round because someone found out if you get the hypothalamus to give you the death signal by watching a scary movie alone in the dark that our minds flaw is if you don't run for the light switch it will believe you died and you become a ghost people.?"

If they say "yes" then they are in touch with reality. If they say no then they are either in a comma or they are hiding because they somehow believe that's "bad or good."

They would hide for either example. If they thought it was good to be a ghost people they may hide and if they thought it was bad to be a ghost people they may also hide. There is no consensus whether this flaw is “good or bad”.

Some ghost people are reacting to the shock of being a ghost person.

Some ghost people are not reacting to the shock of being a ghost person.

Nearly no ghost people are acting like ghost people.

If you expose 10 soldiers to combat some of them may act differently than others after “hard combat” because they become ghost people. So perhaps you can see why the Abraham story with Isaac, him using this "flaw" in people to become ghost people was so important relative to the world.” - Copyright : TXu 1-978-672

“It’s like that story of Frankenstein where the people chase Frankenstein down the mountain because the people saw the ghost people he was as scary or different. That’s not real that’s called Hollywood. That’s like when Lestat in the “Interview with the Vampire”, listens to a tape of Louie and says "Louie, Louie, always whining."

That’s hilarious but it also shows a decent point. There was a soldier who saw combat and obviously faced his fear, and he came back home and couldn’t adjust and fell into a string of events that cost him his pulse.

So the reality of civilization would say "he had ptsd" and died. So you may read that and not factor in ghost people and think 'I'm aware of reality.' when you factually are not even close. Factually perhaps because Abraham’s story is not translated properly soldier/ghost person could not acquire proper attention.

He perhaps was still in full blown shock after "facing his fear" , becoming a ghost person chasing machine gun nests in combat. I assure you if certain aspects that you think would tell you these things haven’t yet, they are never going to.

Like your leader, is in shock, they won’t tell you, your perceived leader in your vicinity won’t tell you. They make up scenario in their mind because the Titanic is sinking.” - Copyright : TXu 1-978-672

“There was a decent ghost people he was a young kid perhaps early 20's and he was in a video and he was playing with a cat (right hemisphere symbol) and he said" I like cats" and then he jumped into an explosive laden truck in Syria and drove into some "enemy" position and blew himself up.

He should be remembered because he was a decent ghost people in a situation where ghost people are not even acknowledged.

It's mainly an example of shock and trauma and partly as Buddha suggested "contact" with a structure that doesn't acknowledge certain perhaps important realities. Like being friends with someone who doesn't believe in rain and when it rains they say no its not I don't believe in rain. After a while you perhaps would have to distance yourself from them or become like them. That's an example of "contact".” - Copyright : TXu 1-978-672

“Baby ghost people are very impressionable just like a baby person is. Someone maybe did things to make him, the one in Syria, to think he was something "a cat"(right brain dominate) but that's just relative again to the importance of the Abraham story perhaps.

Perhaps one thing to consider is, the comment "wise like a child". In a situation of absolute delusion, their perhaps cannot be any adults smarter than a child. If someone uses reading writing and math to make children "delusional" by discriminating against an entire hemisphere, then the only intelligent people, not ghost people but living people, are the children.

In many ways that perhaps is absolute reality. Perhaps everyone ghost people and living people are at the mercy of someone other than children. So in reality who would rather be in charge: An adult, a child or a(decent) ghost people?

One issue is, until Abrahams idea became reality, the titanic(earth) was going to sink, perhaps. Another way to look at it from a no time point of view is, Abrahams plan is in many books but refusal to acknowledge it is why the Titanic(planet and everything on it) is sinking.” - Copyright : TXu 1-978-672

“It’s like the commercial where there is an Indian standing by the road of an interstate and someone in a car drives by and throws trash out at his feet and the Indian has a tear rolling down his face.

The interstate is the earth, the trash is what is occurring on the earth, and the Indian is a child or a decent ghost people. A decent ghost people is one who has not allowed the laughing gas aspect of being a ghost to overcome them. The Indian saying goes "Adults are just borrowing the planet from their children."

When I detect intelligence relative to civilizations authorities I will come to your house and remind you. As a friend of mine recently said in a speech "ultimately inhabited".

Do not go into application of this ghost people method thinking it will save you, or it’s a requirement or something bad will happen if you don't. It’s your choice. You can.

It’s something that's manageable and also possible at this day and age of advanced technology. Today we are only 5400 years behind where Abraham was. So now you have been informed of some information that's outside the realms of societies permission slip.” - Copyright : TXu 1-978-672

“Like in the movie matrix where neo says "this is not where it ends this is where it begins." The Abraham story is where it begins and everything else are just aspects in some dream where somehow the Titanic misses the iceberg and is floating on cotton candy, perhaps.

Because of the mental state the education has put you in its important perhaps to use patterns.

Pattern 1: The Abraham and Isaac fear not equals ghost people, pattern. Think carefully has anyone ever told you that and since the answer will certainly be no, then you can see, that as a pattern in the "system" they don't want you to know.

That leads to the next pattern. "they don't want you to know that because then you would know there are ghost people" then that leads to the next pattern.

"They don't want you to know there are ghost people because.....

“Ghost people are bad.”

Or

“Ghost people are good.”

Or

“Ghost people are mistakes.”

Do not worry about the control aspects reading this they seem to have certain belief systems that will not allow them to entertain certain "comments", perhaps. I'd advise playing command and conquer 3 on brutal setting until you start to elevate your strategy aspects before application of the Abraham idea. Someone said, if you can say anything nice don't say anything at all. Perhaps I should tell you what I really think." - Copyright : TXu 1-978-672

Method 3: "To become a spirit person Get in a situation where the mind gives the perceived death signal and when it does just ignore it or pay no attention to it." - Copyright: TXu 2-037-947

"Alit manus nigerrimus intelligit facta.

These are patterns relative to Ghost Person Accomplishment.

((([Socrates said "No true philosopher fears death"]

[A 17th century Buddhist monk said "Meditation during action is a thousand time more effective."]

[Another Buddhist tradition of the is, "Mediate alone at night in a cemetery."

[The story of Medusa, one finds Medusa in a dark place and when they look at her they turn to stone (stronger)."]

Relative to the western religions these are the explanations.

[Fear not] - Abraham and Isaac story is the "example of" fear not.

David - [Psalms 23:4 Yea, though I walk through the valley of the shadow of death, I will fear no evil: for thou art with me; thy rod and thy staff they comfort me.]

Jesus - [Luke 17:33 Whosoever shall seek to save his life shall lose it; and whosoever shall lose his life shall preserve it.]

Mohammed - Submit] = The spirit of all these arrangements of the marks is the exact same checksum.

This means every statement is interchangeable.” - Copyright : TXu 1-978-672

“So starting at the first one.

No true philosopher fears death.

[philosopher] - A person that asks why a lot or ponders a lot, relative to right brain ambiguity. Jesus had moments of ambiguity. Like when my infinite wrath proclaims: "You need to get a job" I say "Why?" a lot.

So if one does not fear death, they must have:

[finds Medusa in a dark place and when they look at her they turn to stone.]

[Meditation (fear not, submit mindfully, lose your life mindfully) during action (shadow of death creates the action) is a thousand time more effective.]

So to get an idea of how this remedy works, one must firstly forget about Left brain physical reality and travel if possible to right brain non verbal, non physical reality.

Because this comment explains the scribes killed Jesus, one can just substitute scribes in Jesus's explanation of the remedy for "whosoever"

[[Luke 17:33 Whosoever shall seek to save his life shall lose it; and whosoever shall lose his life shall preserve it.]

Firstly L is relative to Lord and thus is the number 7. 1733 can be worked out to mean 77 ($1+3+3=7$), so this line in part is marked 777 and it is also the remedy.

Luke 17:33 = If you get the mind to give you the death signal and don't run, you become a ghost. Thus this is “flaw” in at least humans but perhaps all mammals and perhaps all creatures with a “caution sensor” aspect to their mind.

[whosoever shall lose his life shall preserve it.]” - Copyright : TXu 1-978-672

“Because Jesus was known as the Lord of Logo, logic, then it is important to attempt to use logic on his comments.

From a left brain physical point of view Jesus was walking around saying:

Scribes who lose their life literally, literally preserve their life, literally, even though they become ghost people. Perhaps that's why things get confusing in some areas.

Jesus was saying from a left brain point of view:

A human that dies literally lives literally. That makes no sense and that is not even possible ever into infinity, so that means that is certainly not what he was saying.

Now if one negates left brain physical and considers right brain non-physical, then they can read that line like poetry, meaning there are code words.

Firstly Jesus said the kingdom is within, which means right hand side once unveils puts one mindfully in the "kingdom:" meanings the ideal plane or consciousness. So the kingdom is within means in the mind, and thus if one applies mind (fully) to his comment, one comes up with.

[The Living who lose their life mindfully preserve their life]

So factoring in the curse(literacy and or science exposure), it is just saying, those with the curse the scribes, who lose their life mindfully , restore their sound mind they were born with, or they negate the curse, except then they are ghost people.

This concept is called the "resurrection."

X = Resurrection

Y = Dead/mentally exposed to the marks and or literacy and or education and or sorcery(all the same thing).

Z = Ghost person after application

Y + Z = X” - Copyright : TXu 1-978-672

“So one has to first understand this spirit of fear from a strictly physical point of view.

The brain has a hypothalamus (caution sensor), this regulates fear and also hunger.

That's a medical fact, not a spiritual fact.

So if a person was attempting to say, "The script and math makes one afraid or creates abnormal fear because it messes up the hypothalamus "signals", one might say this.

[2 Timothy 1:7 For God hath not given us the spirit of fear; but of power, and of love, and of a sound mind.]

Thus it can be deduced that God would never expose us to the marks and or sorcery and or literacy. It can also be deduced that an enemy would never submit an accurate situational awareness report.

So this is saying, people are not born with so much fear, it's that tree of knowledge that creates so much fear when it discriminates against the right hand side, meaning a side effect of bending the mind to the left is "the hypothalamus goes nuts and one become afraid of nudity, words, sound, and probably their self"

So a straight forward way to say how to become a ghost person is, one has to trick their mind when it gives them it most powerful signal, the death signal, to think they don't care, and that makes the mind think a person died, and then about 30 days later, the mind resets and in doing so, it restores right brain traits, unless that hemisphere died as a result of exposure to literacy, and then one is a ghost person.” - Copyright : TXu 1-978-672

“If one understands computers, once one gets a virus, sometimes it’s best to just reset the computer and that may make the virus go away, or leave memory.

If one is pleased with religion. One has to make that snake that is placed on their back by the number’s think, this person has died, and so it lets them go.

If one likes psychology, then one is simply using those abnormal fear signals, to "watch a scary movie" and when their mind says "A ghost or shadow is coming to kill you" one tells their wacked out hypothalamus, "I don't care I love death" and the mind itself determines, it must reset because the being no longer listens to it, and so the person becomes a ghost person.

Seek the shadow of death and fear not when it arrives. Is from the person explaining the remedy, point of view.

So relative to one that has applied the remedy, they understand what they did, since they are alive physically after they apply the remedy, is, their mind said "death is coming to kill you in this dark place"- Copyright : TXu 1-978-672

“So Jesus' version of the remedy is from a person who has the curse point of view.

"Scribes who lose their life preserve it"

David's remedy was from "his" point of view.

Scribes who seek the "shadow of death" because they are hallucinating they see it as actual death, and then fear not, preserve their sound mind.

So if one goes to a place they perceive it is certain death in the form of a ghost or spirit will factually kill them that's a good place to attempt to apply the remedy.

Go mediate in a cemetery alone at night until you feel better, is another way of saying the remedy.

The cemetery is what will cause the action or shadow of death, and then meditating when that happens means one does nothing or mentally submits, or mentally fears not.

No being that learned how to count as a child is above this remedy but the very fact a being with the spirit of fear when told to "go find a ghost that wants to kill you literally and let it kill you literally" will repel from that and say "That sounds scary and dangerous" is why, the is parable of sower is reality.” - Copyright : TXu 1-978-672

“That means if the universe makes it a law that everyone had to become a ghost person no matter what, if they can count, about 14 million people would be able to pull it off, because the spirit of fear is so strong, their fear is so strong, they won’t get near the shadow of death because they think they will go to hell for saying a cuss words or seeing a nude person.

Perhaps using this method to become a ghost person is wrong or evil or bad. But there is no input about it one way or another, thus it seems to be an uncharted area of reality.

So because of the alternate perception dimension reality, the rift created by the curse, being in the sense of time perception dimension, cursed, and one who are in the infinity, no sense of time perception dimension, it is best to say exactly what it is.

One slept with the snake, got literacy, and that snake is kind of dumb. That means one can trick it into thinking they died, and make it go away. After it goes away one has to start re-live over, meaning, their "intuition" (eyes" are restored so they have to learn what life is like with eyes.” Copyright : TXu 1-978-672

“So one has to mindfully kill their self literally not physically literally.

In the movie fight club the remedy is demonstrated at the end of the movie.

The main character takes a gun and put it in his mouth and pulls the Trigger.

Absolute suicide attempt, but the bullet missed him or went out his neck, his alter ego Brad pit saw him "suicide" himself, and was convinced it was real death, so that alter ego died, but the main character did not, so he tricked the snake off his back.

Using the mark's arranged in a linear fashion on a piece of papyrus to caution against using the mark's arranged in a linear fashion on a piece of papyrus." - Copyright : TXu 1-978-672

“One more example:

In the movie, dances with wolves, at the beginning the main character is depressed from a wound, and ride's his horse across confederate lines, and the general on the union side says "Looks like as suicide"

The main character rode his horse in front of the confederates and they fired but missed him, so he turned around and this time, he rode he held his hands in the air to say "I submit, I fear not, I absolutely give up" No one shot him, they all missed, but his hypothalamus doesn't know that, it just think's that person, died.

So that being applied the remedy, and then went to live with the Indians, because one who applies the remedy has such strong telepathy, they cannot live with the ones with the curse, which was "the white man", so he went to live with the ones who never got the number, or the non scribes, the tribes.

The way I understand how it works is, once a being with the curse hears the remedy and understands how it is applied they have this concept called "Their fate is sealed" meaning they have to answer for not applying the remedy once they hear it. Uncertain what the consequence might be." - Copyright : TXu 1-978-672

Method 5: "To become a ghost with a pulse encounter a situation where the mind gives a perceived death signal and when you do just ignore it or pay no attention to it." - Copyright: TXu 2-037-947

"If it's world war 2 then war may be a positive number.

So some political slogans may be, "I bring change"

Change is relative, if the economy and other facts are good then that comment sounds unwise or bad. This is like floating point math.

"We need change" if things are going well, then that's a negative number equation and if things are going "bad" that's a positive number. So that's a floating point equation with a floating point number. It's not words it's math.

"You look nice today"

"You" is perhaps a big positive number in this equation. But it's because of the "numbers" at the end of that equation.

"nice" is a "good number" say +70 and today is a zero number.

you = 200

look = 0

nice = 70

today = 0.

270

So you may feel "happy" about that comment but only because the numbers register positive in your mind.

As "nice" increases in value your overall score is increased.

"You look excellent" = high positive number = nice feeling

"You look shitty" = High negative number unless said jokingly.

"You smell terrible" = High negative number

So this mind is reacting to number equations."- Copyright TXu 1-990-315

“11/4/2015 6:59:47 AM –

“An action or strategy carefully planned to achieve a specific end.

A plan of action or policy designed to achieve a major or overall aim.

So the main tactic is to confuse the being to the degree they forget who they are and the strategy of course starts with education.

Alter perception with the favoring of a hemisphere in the child and so the child becomes confused and so the overall strategy is the being is confused.

If a person thinks they are anything other than what they are then the strategy has worked and in this case the person factually is a member of a ghost people tribe and at this stage that tribes like most tribes on the planet have been splintered to the degree the tribe itself no longer exists so the overall strategy is to make sure the person is disassociated with their tribe of origin.

Since the aspects relative to this strategy are ruthless and in their goal anything goes no matter what it is simply because they have absolute control, that tactic must also be adopted. In the end anything goes no matter what it is because there is not a winning possibility only abilities to make dents to the overall offensive strategy.”- Copyright TXu 1-990-315

“So the open aspect that is considering is that aspects may think that this or that is perhaps the scary or dangerous aspect and so that perceived scary aspect would be a factor in their behavior although one thing to perhaps consider is these younger brothers and sisters spiritual aspects that may be encountered at some stage in forever infinity and that child spirit would be immediately aware that you were perhaps aware of some sort of out so that they would perhaps not have had to go into forever infinity believing soundly that whoever made them ruined their mind to the degree that they decided to check out when in reality it was the education conditioning that caused the perception disorder and that led to them determining to check out because of some trivial matter in reality that they would have no decided to check out as a result of without conditioned perception reality as a result of sorcery and/or literacy exposure.”- Copyright TXu 1-990-315

“Someone would be facing that child spirit aspect and that aspect may deduce that you were aware of that situation and decided to be safe from some other perceived danger and opt out of explaining it to them and so now you are facing them, and they are aware of the reality and your decisions and it would perhaps be some sort of ultimate dissatisfaction that a being would be confronted with the actuality of their decisions.

Their decision to avoid one perceived threat and the reality that, that safe decision considering who they are facing now, was not a safe decision at all, in fact the perceived threat was not a threat in contrast to the threat they are now facing.

And so attempting to be safe works initially because a being perceives they are safe but as the scale of infinity is unpredictable a safe decision today may be perceived as a fatal decision tomorrow on the scale of infinity.”- Copyright TXu 1-990-315

“Would you rather face a spirit child who is in the scale of infinity or a
PERCEIVED THREAT THAT IS IN THE SCALE OF LIMITED EXISTENCE?

This is perhaps how some people see things. If you are safe now you will be safe forever, or if you made a decision today that effect will carry on into infinity.

Swimming in the ocean in a certain spot today may be safe but on the scale of infinity sitting in that spot at a later date may be fatal.

Child spirits who are angry cannot be reasoned with usually because the living have been exposed to the literacy and or sorcery and thus are not capable of reasoning, not because they are unreasonable, but because the argument with the child spirit usually relates to why it was okay to make that child spirit angry to begin with. Simply put, humans are a Ghost People Species and exposing them to literacy and or sorcery destroys their mind perhaps on a scale of infinity and thus their trajectory is destroyed, and thus those members of the ghost people species who are “okay” with that even after learning that, are no longer considered members of the human ghost species but instead, threats to the ghost people species.” - Copyright TXu 1-990-315

“One perhaps obvious goal of education and or sorcery outside of the obvious main goal that is perception altering through repetitive tasks disfavoring one hemisphere or favoring one hemisphere, is to convince the student of a scale of intelligence or awareness of a situation and then once that is achieved it is easy to push the student to accept their position in a group of people.

If a student gets a 60 on a spelling test and 10 students get a 95 on the same test in the same classroom then that student after repetitive testing will be convinced that those student who scored 95 are factually more intelligent and will treat or act a certain way around those students accordingly, including envy and admiration aspects.

This can be transferred to any situation in life as long as the student is convinced they are not intelligent as most in literacy and or sorcery then they begin to live like that and that is one aspect of civilization that is a tool that keeps the system going.

So the pecking order in civilization is God is at the top and the most evil person of all is at the bottom but these words of course are reversed in reality because of the reverse thing.

That’s means the most evil is at the top and the most good is at the bottom.

Meaning the most good person on the planet is well alone somewhere and generally speaking, no one will ever meet them or if they did they would see them as worthless , stupid.

The most evil person in the world they would see them as intelligent, educated, wise, rich, smart, wealthy, and powerful.

It’s like the girl who was in a foreign country and she was helping the needy and she was about 18 or so and she wrote on her web site that she was happy to be doing what she was doing helping people in this third world country and that was the last post she made on the net, if you are on it you are in it, and he throat was slight shortly after that post.”- Copyright TXu 1-990-315

“No deed goes unnoticed, but in this system(ritual) of civilization it is not important what side you are on, in reality because the system itself is failed, a failed system and a perfect sorcery ritual.

Being good in a failed system is the same as being bad in a failed system and ignoring the system is the same as noticing the system and idolizing the system is the same as hating the system.

The only side there really is that is acknowledge in the system (ritual) is the side attempting to destroy the ritual.”- Copyright TXu 1-990-315

“The ones attempting to destroy the ritual would be the only competitor to the ritual system because every other side is in fact, helping the ritual system.

And the saying “faith is living without scheming” is actually impossible to ever achieve it is like saying “not reacting to reality means you are smart”, or “not facing reality means you are religious.”

“not noticing the girl staring at you with a smile on her face means you are wise.” I is a non-sense comment that is impossible to achieve.

“no scheme is a scheme.”

“no plan is a plan.”

Deciding to not notice means you are reacting to the fact you have noticed and acted upon it.

Not caring means you have decided to act in a way that prolongs your situation and that is a symptom you do care.

Caring to obviously means you have decided to out yourself and thus as far as yourself you do not care.

Absolutes cannot happen because if they could happen they would swiftly eliminate their self because of the environment.

If one decides to always be good then whatever that criteria is, they will eventually encounter a situation that they cannot always act like that so accepting that challenge means a person is concerned about whatever being bad is.11/4/2015 10:09:31 AM”- Copyright TXu 1-990-315

“Most attempts to find a cause for the system ends with seeker finding that an inanimate object is to blame: reading, writing and math or as it was initially called sorcery and or magic, and so they must seek to find something less to blame and that’s where perception lies.

“Is it the school teacher in kindergarten or the school teacher in high school more to blame, or is it the system itself that requires money so people have to get a job and sometimes they decide to get a job as a math teacher or English teacher.

So then the money aspect to live becomes the issue but that is a deeper symptom of numbers so numbers are inanimate.

Settling is harsh. Four in a row Joe, showed us how to go, way against the flow, so few ever show, fuck the boat just row.”- Copyright TXu 1-990-315

“To become a ghost Get in a situation where the mind gives the perceived death signal and when it does just ignore it or pay no attention to it.”- Copyright: TXu 2-037-947

“To become a ghost Get in a situation where the mind gives the perceived death signal and when it does just ignore it or pay no attention to it.”- Copyright: TXu 2-037-947

"This is a cursory explanation and will be founded on a scientists observations and then slowly progress to the non verbal realm.

[..our education system, as well as science (tools of science are math and writing/ dena and demotic , respectively) in general, tends to neglect the nonverbal (intuition, creativity, the soul) form of intellect. What it comes down to is that modern society discriminates against the right hemisphere.] - Roger Sperry (1973)

Adding the comments in () in order to clarify labels.

Essentially that comment is saying in spirit. The science tools, math and writing, are linear based, 123, abc, and spelling is also linear based. That is the domain of left brain, the aspect that is physical focused. In favoring left brain, naturally one would discriminate against right brain traits, because the being is very young in mental development when they start "learning".

So left hemisphere is physical focused and great at linear aspects like numbers and "marks" or characters arranged in linear fashion.

Right hemisphere is contrary, right hemisphere in non-verbal meaning non-physical focused and it is random access based, and it has this sense called intuition.

So in learning the math as a child one veils their right brain traits and intuition is one of them.” - Copyright : TXu 1-978-672

“Left brain physical focus.

Right brain non-physical or cerebral /telepathic focused.

Keeping that in mind,

[Genesis 1:1 In the beginning God created the heaven and the earth.]

Physical focused = earth = left brain

Cerebral focused = heaven = right brain

In theory.

In the beginning God created the heaven (right hand side) and the earth (left hand side).

There are several repeats of this line just worded slightly different, but the spirit of the intuitional checksum, is perhaps identical.

[Genesis 2:17 But of the tree of the knowledge of good and evil, thou shalt not eat of it: for in the day that thou eatest thereof thou shalt surely die.]

Be mindful left brain has an aspect called "seeing parts" this is contrary to right brain "holistic " meaning , everything is good or everything is evil. Left brain would be like “Something are food and some things are evil.”

With right brain one is lacking prejudice and left brain means one has prejudice, in theory.

It seems like these traits can be achieved but with no prejudice putting your hand on a hot stove would and an identical experience to eating a sweet treat.

This is an example of lacking prejudice or unconditional acceptance.

[Genesis 1:10 And God called the dry land Earth; and the gathering together of the waters called the Seas: and God saw that it was good.] = everything looked good meaning right brain holistic perception.”

In theory the above scripture is talking about types of Ghost People and has nothing to do with “explaining creation”. Perhaps more along the lines of giving situational awareness reports to Ghost People.” - Copyright : TXu 1-978-672

“The connection between right brain and the God image reveals itself perhaps when one understands, right brain is understood to be the creativity aspect, relative to "the God image in man" or "the creator image in man". So when a person who is a great artists says "I owe it to man upstairs" they perhaps mean, I owe it to that right brain creator image in me.

[But of the tree of the knowledge of good and evil,] = (good and evil) = prejudice or seeing too many parts, left brain "see's parts"

So the tree of knowledge, is suggesting, its math and writing and that makes one see abnormal amount of parts (good and evil) in contrast to how one starts off life "stamped from the big cloth", a child of God, meaning holistic perception.

A side note: The Egyptian god of literacy, engineering, medicine, writing and math, is Thoth the four headed ram god, sometimes suggested to just have two heads. In theory two heads mean uses both left and right brain thought patterns.

A quite formidable opponent but only in contrast to someone who attempts to use just one hemisphere.

Imhotep was a slave, who learned the tree of knowledge, and rose in the ranks, and was also thought to have built the first pyramid. Imhotep is the patron saint of the scribes. People who learn the number and writing were called scribes, today they are scientists. That "from rags to riches" story relative to just getting some number and writing skills is relative to this comment and perhaps relative to Imhotep.” - Copyright : TXu 1-978-672

“[Genesis 3:6 And when the woman saw that the tree was good for food, and that it was pleasant to the eyes, and a tree to be desired to make one wise, she took of the fruit thereof, and did eat, and gave also unto her husband with her; and he did eat.]

“Firstly, in translating Hebrew to Latin, the "male plural" word turns into a "female singular" word.

This is understood and also "gels" with the reality, the first beings to be scribes were males and Imhotep was their Patron Saint and His God was Thoth the multi ((parts) headed god. So one may sum up Imhotep as a powerful scribe who God was not the one true god meaning, in learning that math his mind bent to the left and he started seeing lots of parts, problems, things that were not “correct” and so his god also had a many parts head. Sometimes a person who takes LSD and hallucinates “noticing” many things they did not notice before the LSD.

[and a tree to be desired to make one wise] = One goes to school to become "wise" or enriched or "well read", but one does not go to school to have this done to them,[discriminates against the right hemisphere.]

One way to look at it is, any aspect that contends it can "teach" a child of God can only be blindness because well, intuition understands everything. It is like telling God, You are good but if you get my number, Ill shore your mind right up" If one attempts to fix perfection they can only destroy it, in this case relative to mental aspect from birth and mental aspects after “ sorcery exposure and/or science education.

In attempting to "fix" our “perfect” minds this certain sinister aspect or spirit, only achieves this:[discriminates against the right hemisphere.]

The scenario is like the mad scientist Frankenstein monster story.

A scientist "learns the number and writing as a child" and this happens:
[discriminates against the right hemisphere.] Because intuition is relative to perception and perception is relative to cognitive ability, that being is clinically insane and has a poor cognitive ability if any at all relative to absolute situational awareness, in theory.” - Copyright : TXu 1-978-672

“Thus we have now a mad scientist. This mad scientist sees a baby, and that baby looks "bad" to that mad scientist because insanity see's sanity as insanity, and so the mad scientist says "I can fix that baby right up" So then we have Frankenstein, created by the mad scientist.

The war between science and religion is based on one single reality.

The science tools, math and writing are linear based and thus when taught to children whose minds are developing, it discriminates against right hemisphere and that is, intuition, perhaps the soul in the light of the ghost people reality, in theory.

So one can look at a religious person essentially as a person who was exposed to the math of the mad scientist and then applies the remedy, and restores right brain traits, and then they speak out against the "scribes" and say "that harms the little ones, so suffer them and send them to me after you "educate" them and I'll explain the remedy so they don't stay "frankenstiened"" - Copyright : TXu 1-978-672

Equation:

Person born 50/50 mind + Sorcery and or science exposure = What humans are from civilization, mentally/spiritually.

With no classification to what a ghost person and /or a ghost actually is in essence and only abilities to explain how a person can become a ghost (person). This suggests actually explaining ghost methods may not be able to be categorized as good or evil. If nature in making the aspect of the mind that gives one caution or alertness in potentially dangerous situations did not end the code “ this situation requires extreme caution or fear or tactics” or you die, and if that person ignores that their mind and natures code made it so it now considers that person a ghost, permanently, suggests Nature may not even be aware there is an “afterlife” ghost aspect to our species and perhaps any creation with a mind capable of getting fear or caution signals.

In Theory, if Nature is not aware of the spiritual/ghost aspect of reality then it suggests either nature is secondary to the spiritual world and /or there is something in the subset “nature” that is not of nature, and thus there is something in the universe that is not a part of the universe.

“A relative IF/THEN statement:

If one eats off the tree of knowledge, then, for in the day that thou eatest thereof thou shalt surely die (they must apply the remedy, keep that Sabbath, or keep the coevenent.] to restore right brain traits.= become a ghost person.

So reverting back to "heaven and earth"; left brain see's parts so its god would have multiple heads. The "one" true God would have one head, and that is relative to right brain holistic aspects. The battle of left and right.

In theory entering a battle over what hemisphere is correct is a symptom of the science exposure and perhaps not a virtue.

Because of the nature of this situation, going up against scientists, which were scribes back them, was dangerous, because their Golden calf, makes one physical focused, because it favors left brain, and so if the scribes ever said "Guess what our math and writing does to your babies mind", common people would be displeased perhaps, so that must never ever enter into the realm of "questions".

One being attempting to stand up to the ones of the "number" and he tossed a symptom of their "number" exposure on the ground "money" and Bael is relative to commerce, GNP, etc.

So Thoth is relative to literacy and a side effect of that is an economy and that's god is Bael. Perhaps it is important to understand the remedy and how it is to be applied.

Very interesting.

There is a thread in the Religion section of this forum that is asking for peoples opinions of what the tree was, you might want to join in the discussion there too.

calaquendi is offline Reply With Quote” - Copyright : TXu 1-978-672

“Axiom A [If you teach, expose, make accustomed ; the little ones to the math and writing aspects, it will turn their perfect harmony mind into a more perfect harmony mind.]

In reality the actual axiom is this : Axiom B [What it comes down to is that modern society discriminates against the right hemisphere. (via the math or science] - Roger Sperry (1973)

The concept is:

X = sound minded being when born 50/50

Y = Mental state after getting the "number" relative to this (left brain physical) reality: modern society discriminates against the right hemisphere.

Z = conclusion

X + Y = Z.” - Copyright : TXu 1-978-672

“One of these beings that was suggested to be "on the right hand side" or as some might call it "one with a strong force" which means they restored "right brain non- verbal aspect like "intuition", as the result of "keeping the "sabbath" which is just code for the remedy and /or ghost person acquisition.

"Forgive them for they know not what they do."

[they] = Followers of the literacy god, Thoth, and their patron saint is Imhotep, and we know the number favors left brain and makes one physical focused, because he built the first pyramid.

"Forgive them for [they][us][you][me] know not what they do."

In theory it's like a car full of drunks and you are the designated driver and after about an hour driving you are ready to have a few drinks yourself because your patience is running thin, babysitting members of a perhaps unique ghost species and some of them that lost their minds during the science and/or sorcery exposure, and forgot the females offspring sanctity means more quality ghost people and if you let anything happen to the females offspring, you going to have a planet full off less than pristine quality ghost people, and thus you failed the only mission there ever has been. That perhaps is the top 5 greatest cost of exposing the females offspring to sorcery and/ or science.” - Copyright : TXu 1-978-672

“Follower of the patron saint Imhotep, or simply just "people who learned the pen as a child".

It is important to perhaps separate this situation using Plato's Left foot, physical, and right foot, spiritual, non-physical comment. Plato was a ghost person.

Ghost people have important things to say and the sorcery and/or science exposed living, wonder why they don't have anything important to say.

"Forgive them for they know not what they do." = They are hallucinating because in learning the pen as children, it favors left brain so much, they have an honest to goodness "perception disorder". In theory all ghost people in civilization were once living and were also exposed to the sorcery and /or literacy.

That means, since one gets the number as a child, and it is taught it to them by an adult who also was exposed to the number, which causes the perception disorder, then the number itself and the literacy itself, is perhaps a Trojan horse, perhaps beyond our ability to even understand relative to understanding literacy as a weapon.

X = everything in nature

Y = everything not a part of nature (ghost world/area/dimension)

X + Y in theory should equal everything.” - Copyright : TXu 1-978-672

“It is important to attempt to keep the foot in the "left" physical focus perception when looking at this because the actual perception disorder "curse" makes one very physical focused, a consumer, and commerce is relative to Bael the commerce god, and also relative to Thoth the literacy and engineering god, and thus relative to math and science, and a Nobel prize winning neurobiology said this about the very science he won Nobel prizes for:

This perhaps indicates, "religion" is at best damage control. It appears the remedy is only really considered a holy "crusade" on an individual level if one looks at taking an antidote to a bad dose of acid as a holy crusade.

[..our education system, as well as science in general, tends to neglect the nonverbal form of intellect. What it comes down to is that modern society discriminates against the right hemisphere.] - Roger Sperry (1973)

The above comment if one considers "They exposed to the number, know not what they do" meaning as Dante explained, "have their head turned around backwards"

Simply put, if one puts on blinders and tries to cross the road, it will be tough because they have a perception disorder, and if they tried they would get hit by many cars, and a being observing that may say "Forgive that guy he knows not what he does" kind of like saying "He is tripping so don't think that was a sound minded human being" or , “That being would not have acted like that if they did not get exposed to the mad scientists "education " aspects. If a person is tripping and they do something outrageous, one does not get very emotional; because, that person was "under the influence".”- Copyright : TXu 1-978-672

“Patterns is one way to detect the rift(spiritual dimension), some call it the reverse thing and some call it anti-harmony and some call it anti-normal or anti-chirst or anti-child of God.

So a being is born in 50/50, they get the science, and it discriminates against the right hand side, and because the ones who "educate" with it "know not what they do" then it's an attack. If there is an attack and the one being attacked cannot respond then it's a fatal attack.

[our education system, as well as science in general] discriminates against the right hemisphere.] {veils right brain traits and one trait is our radar, intuition, the "sixth sense". it telepathy essentially.]

So because a being in physical left brain state exposed to the number, would perhaps start suggesting "supernatural" it is important to translate that ideal back to : left brain physical]

[tends to neglect the nonverbal form of intellect.] = non-verbal = non-physical = non-energy and non-matter.

In Theory, If there is a place that has 50% physical and 50% ghost dimension and a personality saw a part that “wrong” or in need of fixing, then using the literacy would essentially turn off the part of humans minds, right brain, that related to that “ghost dimension” detection and thus attempt to make everything all physical appearing and making the “ghost dimension” aspect of reality seem to not exist at all.” - Copyright: TXu 2-037-947

“So, this number is discovered and these scribes start using it, and it veils right brain, the right hand side as a side effect, and that turns off our radar. Trojan horse. Roger Sperry studied the human brain so much to "arrange those marks in a linear fashion" that he caught kuru, and died from it. The laughing sickness one can get from eating human brains.

So a parable would be the only way right brain could communicate because , it handles everything in the universe except verbal and physical aspects. The problem with that is a being exposed to the number, only has physical focus because the number veils the "right hand side", so it appears again as “supernatural”. When in reality it is either ghost people are nature because we are a ghost people species and/or ghost people is the result of a flaw in our mind relative to the “caution” sensor and nature has no idea there even is “ghosts” and thus they are completely unclassifiable and in theory not even a part of the universe while even existing in it.

So once that term is defined and reduced back to "left brain physical"

Left brain physical focused, verbal communication, speech, numbers and letters and words = Natural.

Right brain : non physical, non verbal communication "intuition", no numbers, no speech, and no words or letters = Supernatural.

Thus supernatural means, to a being exposed to the number, the aspects veiled relative to senses, by the number.

So, staying in physical left brain, one can determine what kind of universe we are in, simply by looking at our schematics.

Our left brain deals with physical focus and simple linear aspects.

Absolute contrary is the machine, the right hand side.

Random access processing as opposed to linear left brain processing.

Creativity (the creator image), complexity, paradox, ambiguity.” - Copyright : TXu 1-978-672

“So, "the science/number discriminates against, creativity, lightning fast processing, "intuition" paradox, complexity. And also that right hand side, is dedicated in fact to the "non-verbal non-physical based" realities of this universe, because nature would not dedicate so much power, so the right brain could detect the non-physical, non-verbal based, reality, if there was none.” - Copyright : TXu 1-978-672

“Of course scientist, discovered, the tree of knowledge is the math and writing, or "the number of the beast" or "the number that makes perfect sound minded humans, beasts" or beings that are "under the influence" or "possessed appearing", and it does not appear, anyone noticed in “serious circles” (ie: United Nations) and so that indicates the level of damage done.

If one has a weapon, and it's a tool, and they aim that weapon and the barrel turns back around and is aiming and them. If that person gives an army of a billion that weapon, when the leader says attack, he will destroy his whole army if he gives the order to fire, with that "tool".

Another way to look at it in theory is:

About 4800 years ago this slave Imhotep was tired of being a slave and so he joined a cult, the cult was the cult of the scribes. He being a slave perhaps didn't not get exposed to the number as early as most, so he was perhaps exceptional at it.

This causes the males to jump on this number boat, and thus most scribes initially were males of wealthy families, and then we kind of drowned in a flood of script, because it "discriminates against our minds". That would then mean, the females who did not get the "number" would be looked at like "stupid" relative to a scribe. Females who did not get the perception disorder were sane, so people who were insane would see them factually as insane, stupid and even "evil" or harmful.” - Copyright : TXu 1-978-672

“For example: Einstein said "I quit school at 16 because the math harmed my creativity"

His teacher said "Einstein was thrown out of school because he had behavior problems"

“Relative to what Sperry said, Einstein said "I was being abused by those scribes, and my creator image was being harmed so I did what I had to do, to get out of that place"

This suggests Einstein may have actually had some right brain holistic aspects "saved" because he kind of aborted the "process"

And so perhaps making a holistic comment like:

$E=Mc^2$

c is time and that is relative

So then it is $E = M$

And that means everything is one thing, or holistic. One pattern is many "tribes" suggest they "detect a spirit of oneness in everything"

So that pattern is "holistic" is relative to 50/50 mindset, and the number (left brain mind) is relative to "seeing many parts".

So it is improbable a "scribe" would ever come up with $E=Mc^2$ because that is a holistic perception.

Key to decipher the following "marks/character arranged in a linear fashion relative to "code words relative to "right brain intuition/ parable or poet form of communication"

{[And Eisenstein said " I quit school at 16 because the math harmed my creativity" = creativity a right brain trait , right hand side creator image

His friend Freud said "Neurosis is the inability to tolerate ambiguity"

Ambiguity is a right brain trait, relative to "Jesus was on the right hand side and had moments of doubt/ ambiguity."

Sperry said "Modern society, (the scribes/ scientist), discriminate against right hemisphere." = First two were Ghost People and Sperry is probable. So these mark arrangements are really interchangeable.” - Copyright : TXu 1-978-672

“Using the keys:

"I quit school at 16 because the math harmed my creativity" :

Transposing Freud's comments:

"Neurosis is the inability to tolerate ambiguity"

"I quit school at 16 because the neurotics harmed by ambiguity aspects"

Reverse transpose would look like this, meaning using Freud comments ones transposes Eisenstein comments.

"Math does not tolerate creativity or ambiguity."

“Ambiguity and Science do not mix.”

“Math decreases creativity.”

In theory relative to literacy being a weapon, by learning things one opens oneself up to attack. By not learning things one is also open to attack. Eliminating literacy would mean eliminating everything relative to technology and thus throw humans back to the original job, hunting and gathering. This also is not a comment relative to the “ghost dimension”, that dimension may not even be known by nature itself.” - Copyright : TXu 1-978-672

“That just means left brain is math, writing and linear based, and so right brain is anti that. “

"Oil and water don't mix " concept.

This should not be confused with left brain traits are doing math, counting numbers and writing. It may be improbable to determine what left brain traits are as it appears left brain traits are destroyed and replaced with “counting numbers and arranging marks in a linear fashion” after the sorcery and/or literacy exposure. Meaning: Out of left brain and right brain, left brain seemed to be more accepting of learning the marks and/ or science so it “died” as a result of being more porous of the two hemispheres. This would create a species that seemed to be controlled or inhabited because anyone “left” would be inhabited and anyone “right” would be ones who survived the sorcery exposure, mentally and or spiritually, relative to weaponization traits of literacy.

Now Sperry's comments: Transposed over Einstein and Freud's.

“What is come down to is, the neurotics, with their math and or science and/or sorcery, discriminate against right hemisphere traits like ambiguity and creativity”

This indicates, there is some sort of "inter species ghost people" communication happening as a result of this number "curse". It is like 3 people who are aware all the judges were exposed to the number, so they are formulating a "trial" on this "non- verbal or "parable/poet" communication channel, even though everyone in civilization is okay with exposing the females offspring to the sorcery as a result of duress in some cases.” - Copyright : TXu 1-978-672

“And one being suggested to be "on the right hand side" said "Forgive the scribes for they know not what they do,." (under the influence)

One can relate perhaps to why scribes would be the missing piece of that comment because of this comment:

[Matthew 7:29 For he taught them as one having authority, and not as the scribes.]

Jesus kept the Sabbath (became a ghost person), and removed the perception disorder and in contrast to the ones still "under the influence of the perception disorder" he spoke logically and reasonably. The Greeks called Jesus the Lord of Logo, meaning lord of reason or logic and perhaps in theory in a species fully exposed to sorcery if you can reason slightly you would be considered Lord of Reasoning. In theory, in contrast to a normal ghost person you were average.

Relativity considerations as a result of a ghost species that became exposed to an unknown weapon and/or tool locally called science and literacy and distinctly called sorcery.” - Copyright : TXu 1-978-672

“If a person is on LSD and they see and hear the words of a person not on LSD, they may say "man you are so deep and intelligent and wise" but that's only relative to their perception, not reality.

[Luke 22:2 = The ruler scribes and the scribes in general saw the Lord of Logic, a being that negated the perception disorder as a threat, because insanity see's sanity as insanity.

Transposing the patterns from Freud, Sperry and Einstein into Luke 22:2.

[And the (chief priests and scribes, the neurotics, the math, the science), sought how they might kill him (discriminate against, the ones with moment of doubt, ambiguity, creativity, the creator, the right hand side); for they feared the people (those exposed to sorcery and under its influence.)]

Theory: The ruler scribes in civilization were ghost people and they took advantage of the people exposed to sorcery and were unaware of it, and A ghost person that negated the sorcery exposure and came out with cognitive ability attempted to warn the living people exposed to sorcery and unaware of it.

[for they feared the people.] = This added line, is a symptom of the "curse". Fear. These scribes ate off the tree of knowledge and that is vanity because it doesn't "make you smarter" if it "discriminates against right hemisphere "radar", its just an attack or a Trojan horse and an insane persons, weapon that points back to his own face when he shoots it.

Weaponization theory: Literacy creates confusion in the ghost people species and perhaps that is the only logical way to defeat a ghost person species. A ghost person species would be partially in ghost dimension where laws of nature are irrelevant and thus would pose considerable challenge relative to an adversary.” -

Copyright : TXu 1-978-672

“Keeping the patterns in mind: One can answer this "riddle":

[Jeremiah 8:8 How do ye say, We are wise, and the law of the LORD is with us? Lo, certainly in vain made he it; the pen of the scribes is in vain.]

[How do ye (scribes, neurotics, the ones of the math or number) say, We are wise (sound minded able to see what all the knowledge means), and the law of the LORD (right hand side) is with us?

Simply put, “How can you be sane when that number discriminates against right brain and veils your intuition, relative to perception and thus cognitive ability?”

Perhaps a humor way to say it is: How can you say you are sane when you are insane? Just because you can say “cognitive ability” does not mean things you do are in line with cognitive ability.

Or, “How can you say you understand the Creator when you just veiled his image in man, right hand side, creativity aspect, with that number that makes men act like beasts?”

Staying in left brain natural / physical.

The patterns are important because left brain detects patterns. That means if one was exposed to the math and has yet to apply the remedy, patterns are still their strong suit, so they would detect a pattern when they see one, although they may not have the right brain "complexity, paradox, and intuitional" aspects of "right hand side" to decipher them, so to speak.

This could be explained like "They hear and detect patterns but they do not understand what the patterns mean, relative to cognitive ability and situational awareness."

or

They hear but do not understand

Or

The scribes hear but do not understand because they got that number and one side effect of that number perception state is, [for they (scribes) feared]” - Copyright : TXu 1-978-672

“So a cursory observation relative to patterns and this "curse" would be.

If a symptom of the curse or perception disorder is "fear" then the logical solution would be: {fear not relative to: Genesis 15:1 After these things the word of the LORD came unto Abram in a vision, saying, Fear not, Abram: I am thy shield, and thy exceeding great reward.

So Abraham discovered this "fear not" aspect, or ritual or method, to undo that "spirit" of fear caused by the perception disorder caused, when a person learns that left brain "number" that discriminates against the "creator image'

So Dante said they had their "heads turn around backwards" and some other said "they hear but do not understand" and some other said "they are neurotic because of all that science they got when their mind was in its first trimester of development considering it matures at 25 and the education starts when a parents says "can you count to ten or say your abc's".

This perhaps appears like some quick fix, the curse is a spirit of fear and the remedy is relative to "fear not".”- Copyright : TXu 1-978-672

“This line suggests it is perhaps a bit more complex than that:

[Genesis 3:13 And the LORD God said unto the woman, What is this that thou hast done? And the woman said, The serpent beguiled me, and I did eat.

14 And the LORD God said unto the serpent, Because thou hast done this, thou art cursed above all cattle, and above every beast of the field; upon thy belly shalt thou go, and dust shalt thou eat all the days of thy life:]

One moment "God ." is talking to mark scribes, here "altered " to say female/woman.

What did you do scribes? We ate off that number tree that we thought would make us wise.

[And the LORD God said unto the serpent,]

The very next thing said by "god" after the scribes said we ate off that tree of numbers, is "Serpent"

They went from people to serpent after answering one question. This is the "Trojan horse" reality proof. One minute you are a human the next you are a serpent. Weaponization of a human, a member of a ghost human species into a human weapon that is against the ghost people species as a result of sorcery exposure.” - Copyright : TXu 1-978-672

“One is born a sound minded human and then they are exposed to this number and then they are everything in the universe but "under the influence of the "cloth they were cut from", so to speak"

Another way to look at it is.

Anomalies and patterns like the following would not be happening if everyone was just "insane" as opposed to "possessed" as a result of this "education number"

2000 BC = Number before God, the creator image

2000 AD = Number after death of God, the creator image

This is relative to how the "simple one" Cain, was jealous of his "superior brother" and "killed him" Abel. A sort of Hijacking but on a purely "cerebral, unseen, non-verbal, right brain "intuition "level;" or just one a mental level.

So Abraham, discovered [Fear not, Abram:] was the "cure to the spirit of fear, or the curse. If one is born with two hands, and one is cut off, in contrast to how they were, they are cursed. That kind of a curse, lacking essentials.

So this indicates religion is a kind of damage control to this apparent Trojan horse we discovered about 5400 years ago relative to the west in Samaria and the Egyptians made their "version " of it and Imhotep used as a model to usher that in.

[Chancellor of the King of Egypt, Doctor, First in line after the King of Upper Egypt, Administrator of the Great Palace, Hereditary nobleman, High Priest of Heliopolis, Builder, Chief Carpenter, Chief Sculptor, and Maker of Vases in Chief.] This is Imhotep Titles, and if one considers many of these aspects are relative to math writing and science.

Administrator is like a tax collector or an accountant relative to numbers.

Building is relative to the pyramids and also engineering and that relative to math.

[Chief Carpenter] is also relative to math and measuring, and that also was what Jesus' father was, so that's why Jesus had to apply the fear not or baptism, sacrifice.

So this is all relative to left brain physical; based, but the curse itself is on a mental level, it's a mental bending of the mind to the left and thus veiling the right during mental development, meaning the person can't tell it even is happening at all.” - Copyright : TXu 1-978-672

“If one takes a hit of acid as the age of 2 and it kicks in slowly at about the age of 15 or 16th maybe then they can’t feel it, they will just be hallucinating at 16 and not even be aware they ever took a drug.

This known by some as a soft kill. One is killed on a mental level and they will never know it, unless someone "wakes up" and tries to explain to them what happened and then explains the remedy. If that doesn't happen, then that person is a soft kill, and they never know it. So it appears religion is damage control not "make you better" but "attempt to salvage what is salvageable after that math exposure", perhaps.” - Copyright : TXu 1-978-672

Method 4 - "To become a ghost Encounter a situation where the mind gives a perceived death signal and when you do just ignore it or pay no attention to it." - Copyright: TXu 2-037-947

“Please put a perhaps in the front and end of each sentence especially this one.

1.5 And all will be afraid, and the Watchers will shake, and fear and great trembling will seize them, up to the ends of the earth. – Book of Enoch

This may not have anything to do with “fear” this in fact may be a sort of “control” suggestion. If someone approaches you and let’s say they are much bigger than you, there would be a sort of “fear” so this aspect of fear may be a control aspect, and of course on physical level.

Some in say a chess tournament may fear an opponent not based on his size but on non-physical aspects such as his mental state relative to his mental chess game ability. So for example if there was a warrior and you heard about his record say like the Red Baron , who had all these kills in plane fighting, and you met him, so there would be a certain amount of “fear” and that would not be fear it would perhaps be respect or reverence. So the above comment may be saying there is a certain amount of respect for these watchers or a certain amount of reverence. Of course that left unchallenged could lead to a dictatorship or a fascist organization person in a group of people has much less pull than a person who was in a group who stands alone. “ - Copyright TXu 1-990-315

“It is like a “fear” to be all alone in a situation, and it seems to be a “smart” choice to be in a group. But perhaps as the amount of people in a group increases the “fearful mental aspects” of the people decrease. So it could suggest that fear is relative to the size of the group you are in. If you are in a huge group you may be more afraid than if you are all alone. Of course in this situation being all alone is someone to be rejected when in reality there is no basis for that. It is perhaps a fable. No matter how it is assorted eventually everyone is alone. Everyone will have to face death alone and everyone will have to face situations in life alone no matter how big of a group they are in.

If you are in a band or a baseball team, and you do poorly in your execution of a situation then you will see how fast you are alone even in a group. The group will attack you in one way or another if you make the group look bad.

This perhaps plays out also in the wild. There are these aspects that lead to making aspects feel they are in a group when in reality they are all alone. Certainly there are situations one can be in with groups where they feel all alone, even in a school class room, a person can be there and feel miles away and all alone, and so this all alone aspect is determined to be fear or something to avoid.”
- Copyright TXu 1-990-315

“It is perhaps like this equation

$G = \text{group}$

$S = \text{single}$

$St = \text{strength}$

$Si = \text{Size of group}$

$G + Si = St$

$S + Si = St$

It is perhaps a paradox. The bigger the group then the more strength one has, but it also works the other way the smaller the group the more strength. As the group number increases individual strength or power decreases. As the group decreases individual strength increases. Perhaps the main reason for groups is to make sure no one gets strong. In a group, an individual's options are limited and as the group increase the limits are larger and larger until in a huge group an individual is left to just be an observer with no ability to decided or make choices.

Of course as an individual they have to fight all their battles alone and the large groups can slowly whittle away at them. So people in isolation in certain circumstances become very great in strength. Some people in history who were all alone accomplished great feats that groups would never be able to accomplish just because as the group size increases the options an individual has decreases.” -

Copyright TXu 1-990-315

“The smartest one was rather young in age and he was about 18 and he had an accident that hurt his back and so then he started taking pain meds and that is perhaps how he perhaps accidentally became a ghost person and so then a couple years passed and it the same story for some , and he became aware of the situation and so one day he went to the gun range and got instructions on how to fire the weapon and he the gun range owner said he fired a few shots and then shot himself in the head and that’s what everyone is up against because there are a couple who took some very similar aspects of that as far as leaving early so to speak and so he is the smartest one and everyone else is just hesitant or postponing the reality, and I do think it is because of fear, I think it is because they are ghost people that are trying to correct a perceived problem, what would be known as vengeful ghosts or restless or wandering and unable to pass on ghosts.

I think what is also happening is they perceive they are trying to solve some problem or avenge some situation when in reality they are unable to do that so they are just harming their self and that is relative to the fact they are ghosts.

Like the story where some unjust thing happened to a ghosts that caused their death and so that ghost wanders around trying to rectify or reckoning that situation but in reality that “event” is burned into their memory.” - Copyright TXu 1-990-315

“If you convince them that the event of their death was just an event in time that cannot be corrected then they are forced to move on and accept the fact they were treated wrongly or unjustly and then they can move on, but many and in fact most will not accept that reality because, you are not dealing with a person you are dealing with a person who died in a perceived or even literal event.

Some goals they tend to have may not have anything to do with the living aspects and some do. It seems like some goals have to do with bridging this gap in this vicinity between the living and the ghosts, and make it all one thing, with no separation. So if the problem is the ghost aspect is hidden then the solution would be the ghost aspect is no longer hidden but this perhaps would have issues with the living because not only are they perhaps afraid of ghosts they, may also be afraid or becoming one and also they got the marks and or literacy so they are perhaps also not thinking clearly to begin with.” - Copyright TXu 1-990-315

“One group I met are strictly non talkers and they are strictly business and no talking. This perhaps has advantages but also perhaps whatever goal they have may not be so understood. It’s like many ghosts with various objectives. I don’t think any of the objectives have anything to do with making the world a better place because with the marks all over that perhaps is not even a possibility, so they go down a few rungs or down a few levels below that and then pick a goal to accomplish and this affords them a reason to not pass on. And this perhaps is the issue that is odd. Because the tribes apply the same ghost person application on their three olds and they just go on with life like it’s no big deal.

Theoretical Equation relative to After Ghost Accomplishment Literate versus Tribes.

X = Literate, exposed to the marks and or science and or sorcery.

Y = Tribes, no exposure to literacy and or science and or the marks.

Z = Ghost Person accomplishment, get the “caution sensor” to give death signal then ignore it.

A = behavior; using hunting and gathering as a baseline normal.

$$X + Z = A$$

The A/behavior of humans in the ghost people species is very far away from hunting and gathering perhaps as a result of the literacy exposure and also their parents never taught them how to hunt and gather.

$$Y + Z = A$$

The A in the tribes, they seem to not miss a beat and go right back to hunting and gathering.” - Copyright TXu 1-990-315

“But some ghost people because of the marks, which is an injustice in reality, and thus many are angry ghosts at the core level and so they wish to stay around to inflict some kind of payback.” - - Copyright TXu 1-990-315

Method 6 : "Encounter a situation where the mind gives a perceived death signal and when you do just ignore it or pay no attention to it." - copyright: TXu 2-037-947

“chasophobia: noun: fear of the inability to detect discernible patterns.”-
Copyright TXu 1-990-315

“11/5/2015 10:28:05 PM

Gen 1:16 And God made two great lights; the greater light to rule the day, and the lesser light to rule the night: he made the stars also.

Gen 1:26 And God said, Let us make man in our image, after our likeness: and let them have dominion over the fish of the sea, and over the fowl of the air, and over the cattle, and over all the earth, and over every creeping thing that creepeth upon the earth.

[he made] and [Let us] = confusion = no monotheistic

[make man in our image] = experiment

Expose the offspring to sorcery and or literacy and then they will be sorcerers like we are.

Create would be make something from nothing, make would be forcing something to be what you want it to be.”- TXu 1-990-315

“How?

Gen 1:27 So God created(made) man in his own image, in the image of God created he him; male and female created he them.

[created man in his own image] = experiment

how?

[.our education system, as well as science (tools of science are math and writing/ dena and demotic , respectively) in general, tends to neglect the nonverbal (intuition, creativity, the soul) form of intellect. What it comes down to is that modern society discriminates against the right hemisphere.] – Roger Sperry (1973)

= break what's not broken then fix it and get credit for fixing it.

= like some tow truck drivers will lay stuff in the road out in the middle of nowhere and cars run over it get a flat or two then they get a call to "help them" and the people in the car think "It was lucky and good fortune that this guy was here to help us" thus turning something that is dastardly seem like something that is a blessing.

Intentional break + fix = Gratification where none is deserved

[make man in our image] = personality trait, self pride, “If they were like us they would be great also.”

Seeks acceptance . why? Unacceptable to man. Humans would not like this thing on its own merits so it developed a strategy to gain acceptance.

Intentional break + fix = acceptance

[science discriminates against the right hemisphere.] = break the mind intentionally, then fix the mind, then that person thinks you are kind and caring = acceptance.

Thank you for breaking my mind and then fixing my mind I accept you.” - TXu 1-990-315

“Battered Person Syndrome

The abused thinks that the violence was his or her fault. [science discriminates against the right hemisphere.]

The abused has an inability to place the responsibility for the violence elsewhere. {science is what separates the tribes without education from civilization} Abused can't blame civilization(ritual) it would be suicide.

Overall theory:

A force encountered a ghost people species perhaps on a ghost creature planet and saw it as a threat, perhaps from previous encounters in the universe and decided to destroy it and or control it, using its technology and or sorcery.”- TXu 1-990-315

“Personality Trait 3: Deep protections. Complex defense.

If you complain about [science discriminates against the right hemisphere.] = intentional break + fix = acceptance, we will send all these aspects from civilization who we have been abused, and have accepted us, after you.

Thus the comment (forgive and forget)or (let it go). These are not concepts that are valid except within civilization(ritual).

It's like forgive and forget is great if someone hits you or says bad words to you, but it's not valid for ghost people species extermination tactics, but propagation of this concept is used as a tactic. A tactic devised by

[And God said, Let us make man in our image]

One comment is “Faith is living without scheming.”

Scheme: Intentional Break + Fix then Person acceptance.

What do you do with aspects that say that education messed me up? [science discriminates against the right hemisphere.]

Scheme: Coverall concepts - Forgive and forget, it is human to error and divine to forgive.

It is possible whomever is attempting to destroy the ghost people species appears mentally retarded because attacking a ghost people species offspring is perhaps always fatal or suicidal because perhaps a ghost people species has potentially unlimited intelligence due to the ghost aspect of its nature. “ - TXu 1-990-315

“Scheme: if you want to be divine you should forgive being mentally abused by [God] [And God said, Let us make man in our image] = [science discriminates against the right hemisphere.] = tree of knowledge

Scheme - If you don't forgive, then you are evil. Make the abused believe or perceive they are the reason they were abused.

Battered Person Syndrome

The abused thinks that the violence was his or her fault.

[The abused fears for her/his life, and/or, the lives of loved ones whom the abuser might or has threatened to harm (e.g., children-in-common, close relatives or friends).}

If you don't forgive like your parents did and have offspring we can expose to sorcery, society of the ritual, they may disown you not because they are divine but because they are [Gods children].

Of course perhaps nothing is paramount over the offspring of a ghost people species, nothing.” - TXu 1-990-315

“So this experiment started a long time ago.

Negated the parent child unspoken contract and destroyed mankind because it destroyed the family.

This God put itself between the parents and children and so if the children do agree to being abused if they survive the parents are already inhabited because no ghost people species parent would ever allow their offspring to be exposed to sorcery that on a scale of infinity drastically alter their trajectory.

If a child cannot trust their parents on a civilization scale then there is no families, just enemies who will do whatever it takes to make sure you either join them in destroying the family and thus ghost people species or they eliminate you.

Thus they are not members of the ghost people species but agents for:

Gen 1:27 So God created(made) man in his own image,

Relative to –

Seeks acceptance.

Why? Unacceptable methods to ghost people species.

Ghost people species did not like this thing on its own merits so it developed a strategy to gain acceptance.

Intentional break + fix = acceptance + be my friend + now your my friend you may have to harm your children (education) and if they don't (see the light) you may have to help us eliminate them.

God trait: Highly intelligent militaristic strategist, conquest, conqueror. Dislikes ghost people species.

Speculation why?

Encountered ghost species before and they were formidable.

Encountered Ghost people Species before and they were formidable or defeated by them.

Determined Ghost People Species are “evil” because they are a paradox, living and also dead.

Determined Ghost people are different and thus determined to be “evil” or a threat or unwanted.”- TXu 1-990-315

“To lay this out as a human military.

It would be like country A dropping a deadly chemical on country B.

Then country A moves in and provides the cure.

Then country B accepts the cure and Country A is accepted as a friend.

And anyone in country B that says "no they dropped the chemical initially, they are tricking you" would be eliminated by members of country B that befriended country A. = complex psychological, fear of harm strategy, fear for life strategy.

Results in indications that the Ghost People Species is being exterminated.

The best ally is an enemy that hates itself.”- TXu 1-990-315

“So the "we are all good" concept or "we are all God’s children" applies to everyone but the tribes who do not expose their children to the sorcery/literacy.

Tribes are not a part of civilization (ritual) and thus the master/ servant aspect is relative to "God" being both.

This "god " can be a servant or a master, so it always wins if you play that game and if you don’t play that game you have "all gods children"(created using literacy/sorcery after you, and “gods children perhaps are not member’s of the ghost people species but its adversary.” - TXu 1-990-315

“Thus the concept "it's rough all over" meaning {God} is a master but not a tactician that cannot be understood or known by a ghost person species and thus not an undefeatable tactician and thus may indicate why “God” is so ruthless in “making” ghost people species in his image using sorcery and or literacy.

Kind of like saying “Be ruthless with that ghost people species and don’t mess around they are formidable.”

Like: If you accept the ghost people species offspring being exposed to the sorcery and or literacy then you are a traitor to the ghost people species you are a member of, and thus you dislike yourself.” - TXu 1-990-315

“A paranormal investigator meets some people and befriends them because they are also interested in paranormal investigation, but it turns out they are really ghosts people and in turn do certain things to lead or` enable that paranormal investigator to also become a ghost person and then the ghost people believe they have a nice toy or` a nice tool because they neglected to consider why that paranormal investigator was looking for ghosts in the first place.” - TXu 1-990-315

Method 9: “To become a ghost Get in a situation where the mind gives the perceived death signal and when it does just ignore it or pay no attention to it.”-
